Driveway Approval Request

CC&R's Section 3.5 Driveways - All driveways which are established upon a Lot by an Owner shall be surfaced or paved with concrete, gravel, cinders or asphalt. The location of the driveway and the materials used shall be approved by the Declarant or Architectural Committee prior to the commencement of construction or use. All driveways must be ten (10) feet in width.

- A. There are no current plans to amend the materials or width requirements identified other than to interpret the 10-foot width requirement as a minimum. It is highly recommended homeowners use circular drives wide enough for emergency vehicles to enter and exit the property.*
- B. Crushed rock is an acceptable surfacing material that must be Approved by the AC.*
- C. If a culvert is installed with the driveway, a County permit may be required. The Owner will need to confirm the permit requirements.*

I have read and acknowledge the above information:

Initials here: _____

Date: _____

Please print the following information

Lot #: _____

BRE Street Address _____

Property Owner Name: _____

Mailing Address: _____

City, State Zip Code: _____
