Mesa, Arizona 85205

Policies and guidelines for landscape maintenance, property changes and architectural control

Revised May 2026

1. Introduction:

The Supplemental Tract Declaration and Amended and Restated Covenants, Conditions and Restrictions (CC&R), Articles V and XIII for Alta Mesa Townhomes, together with the master declaration of Alta Mesa, require architectural control of all changes in structures and landscape. This document is published to assist the Homeowners and residents in making decisions on changes, improvements or upgrades to their individual lots, and to preserve and protect the appearance of the community consistent with the existing architecture and landscape scheme.

2. Maintenance of Landscape:

The Alta Mesa Townhomes Association (AMTA) shares responsibility with each of the individual Homeowners for maintenance and upkeep of the entire Townhome community. Individual patios surrounded by walls at the rear of each dwelling unit are the sole responsibility of the unit owner/occupant. Each owner/occupant shall keep his patio in good order and repair, free of debris, including pruning of all trees and shrubbery, in a manner consistent with good property management. The front yards and patio area maintenance is a shared responsibility between the Homeowners and AMTA as follows:

AMTA provides community wide contractor maintenance service for the upkeep of lawns and pruning of shrubbery, along with the maintenance of the community irrigation system. All trees will be trimmed up to 8 feet.

Individual Homeowners may prefer to do their own pruning of shrubbery and/or trees, in which case, they shall coordinate their desires with the Landscape Maintenance Director and the contractor foremen on site.

Individual unit owners are responsible for replacement of and installation of shrubs/trees.

If shrubs are removed or fail due to irrigation, owners must bring this to the Board of Director's attention and seek replacement. This will be considered on a case by case basis.

During original construction of Townhomes, crushed granite was spread around front yard patios and shrubbery planting areas. In some cases, there is a need for additional granite to be spread over base dirt or for supplementing previous applications. The AMTA approved crushed granite is ½ to 1 inch size "WALKER GOLD". In the event Walker Gold granite is unavailable, "MADISON GOLD" is an acceptable substitute. The granite is available for homeowners to purchase from several local or nearby landscape material suppliers.

- 3. Property Improvements and Changes:** When a Homeowner requests changes in their property, either dwelling structure or front yard landscape, these changes must be submitted on the Architectural Request form to the Property Management Company.

Paint Colors: AMTA community structures consist of two colors, which are the only colors permitted, with the exception of external security doors which may also be black, white or dark brown – any other color must be approved on the Architectural Request form. The paint supplier is Dunn Edwards. The color designation for all stucco surfaces is: FZ5742m Sand Dune (Product-SSHL30 Sparta Shield eggshell finish). The color designation for all wood trim is FZ204 Pepperwood (Product-SSHL30 Sparta Shield eggshell finish). The color designation for the wrought iron is FZ5742m Sand Dune (Product-9x Syn-Lustro oil base).

The association is responsible for the exterior paint of all townhomes, however, if touch ups are needed throughout the waiting period between applications, it is the owner's responsibility to touch these portions up.

Windows: The original construction of most Townhome units installed single-pane windows, which are not as energy efficient as newer dual-pane windows. Homeowners may replace their single-pane windows WITH OR WITHOUT THE SUBDIVIDING PANELS, however, all replacements must retain the dark brown frames matching the original window frames. **Provided this requirement is met**, Homeowners may have their windows replaced without submitting an Architectural Request form.

Gates: Homeowners are responsible for the gate to the back of the property. When replacing gates, one must duplicate the structure and design of the original gate and use the paint color of wood trim cited above in paint colors. If a different design is desired, please fill out the Architectural Request Form and submit for approval.

Awnings: Only three colors are permitted for awnings, **Dark Brown, Tan or Adobe**. Installation of awnings in the front of the property requires an Architectural Request form to be submitted.

Garage Doors: If the occasion arises to replace a garage door, the original design must be adhered to including windows. If the panels are unavailable a plain window is acceptable.

Shrubbery: There are numerous varieties of shrubbery and ornamental flowering plants that may be chosen to fill planting areas along sidewalks and in front of patios. Currently there are no restrictions on the types of varieties of shrubbery and hedges that Homeowners may purchase. As stated in Section 2, Homeowners should consider whether they will prune shrubs themselves or have the landscape maintenance contractor do it.

Trees: No existing tree may be removed without completing an Architectural Request form. Homeowners are responsible for the replacement. All trees removed shall be replaced by one selected from the following list of desert friendly trees recommended by Ultimate Lawn Care.

Casalote: Slow-moderate growth, evergreen, low litter, medium thorns, 15' X 15', stunning winter flowers followed by seed pods.

Chinese (Evergreen) Elm: Fast-growing, semi-evergreen, seasonal litter, no insect or pest problems, lawn tolerant, can reach 35' X 35"

Chinese Pistache: Full sun, medium growth rate, flowers in the spring

Feather Bush: Moderate growth, semi-evergreen, high litter, no thorns, 15' X 15' lush appearance as shrub or small tree.

Fruitless Olive: Slow-moderate growth, evergreen, low litter, no thorns, 25' X 25" gray-green leaves.

Mastic Tree: Slow growth, evergreen, low litter, no thorns, 15' X 20' shrublike.

Medium Fan Palm: Slow growth evergreen, low litter, thorns on stems, 10' X 10', multi-trunked for small areas and containers.

Texas Ebony: Slow growth, evergreen, moderate litter, thorns, 20' X 15', irregular growth bark sunburns if over-pruned.

Texas Mountain Laurel: 15-20' X 10-20', burgundy flowers, moderate to fast growth

Texas Mountain Laurel: 15-20'X6-10', fragrant purple blooms in spring, slow to moderate growth

THIS DOCUMENT is being distributed to all Homeowners of record as of the date of publication and new Homeowners shall be furnished with a copy along with the CC&Rs and Bylaws at the close of escrow.

Homeowners of rental units shall provide a copy of this document to their occupying tenants.

The Architectural Request form is found on the Frontsteps website
