August 15, 2017

Dear Homeowner,

The following plant and tree list is being provided for the initial installation of the conversion of your front yard. The association has approved the cost of installing **up to one tree and eight shrubs** depending on the size and capacity of your front yard. Please review the list below and provide your plant selections **in the order** you want them installed. If only 5 plants will fit into your yard where the turf is removed, we will only install the top five selected. If you want more than one of the same type, please number it accordingly (i.e. 1, 7). Also, if you already have a tree in your yard, we will not be installing another tree. Trees will be added to yards where there is not an existing tree. **The construction company will do their best to layout and install according to aesthetics. Due to the locations of electrical lines and other utilities, trees may not be able to go in the center of yards.**

Please provide your selections via email @ [t1@wearevision.com](mailto:t1@wearevision.com) or call us at (480) 759-4945. Any requests received over the phone will be sent a letter in writing to confirm their selections, however we will move forward once you provide them to us.

We will be planting once the lateral installation is completed along an entire street. Your cooperation in expediting your requests is appreciated. We will let you know when the layout of the plants will be done so you are aware the day they will be planted, and can review if you are available.

Please contact Vision Community Management if you have any questions. Thank you.

Sincerely,

Vision Community Management  
Managing Agent for T-1 Management Council
